

# GNUSTEP

## FREE

GNustep is an official GNU project with core libraries licensed under the LGPL

## COCOA COMPATIBLE

GNustep uses the same language and API as Cocoa on Mac OS X. Software written for GNustep can be compiled for Cocoa and vice versa.

## PORTABLE

GNustep follows the spirit of OpenStep, providing an object-oriented framework that runs on GNU/Linux, BSD, Solaris, Windows and embedded platforms.

## DRAG & DROP UI DEVELOPMENT

GNustep's development tools allow rapid prototyping and creation of full-featured desktop applications with ease.
